

What does this module do?

The module allows you to display the cookie warning bar, with the link to the cms of your choice and the cookie consent button.

Installation

Standard installation

Configuration

1. Message: Enter the message you want to display in your cookie bar. Do not change the text {link} so that it can be linked later with the cms that you choose.
2. Link: select from the drop-down menu the cms page that you want to link from the cookie bar.
3. Name of the button: Enter the name that will appear on the acceptance button of the cookie notice.
